SDI is the acronym of Selective Dissemination of Information. It's useful to inform the user about the new entries in the catalogue, related to the search previously effected. Practically speaking, the user receives through an e-mail the notice that in the catalogue there is new material of his interest.

My e-Shelf
It visualizes the records that the user choose from the list of the results previously effected. The user has the chance to save them locally, send them through e-mail or to file them.

Documents in My e-Shelf
